

We Can Prevent Mothers from Dying and Babies from Becoming Infected with HIV: Joint Action for Results

In Joint Action for Results: UNAIDS Outcome Framework, 2009-2011, UNAIDS Executive Director, Michel Sidibe, called for a new and more focused commitment to the HIV response. The Outcome Framework committed the UNAIDS Secretariat and Cosponsors to leverage their respective organizational mandates and resources to work collectively with national and global partners to deliver results for people at country level. It outlined 10 interconnected priority areas, each representing a pivotal component of the AIDS response. It opened each of the ten areas with an affirmative challenge.
