

## The Journey Of Women After 40

Woman After Forty is a psychological journey in the life of every woman, as well as a compass pointing to the future. Women Readers over forty, from the scientific studies from research centers as Harvard University, Johns Hopkins University and the Mayo Clinic, will find their own ways to understand and value their outward appearance and inner strength, in order to feel healthy, useful and fulfilled. Also they will draw strength from their maturity so that they can better serve and enjoy their personal goals at the various stages of their lives. I like to think of it as a breath of optimism to help women confront the future with strength and energy.
