

An Introduction to Mental Philosophy, on the Inductive Method (Classic Reprint)

Excerpt from An Introduction to Mental Philosophy, on the Inductive Method

Some eight years ago I published a small work, entitled *Elements of Psychology, Part I.*, in which I gave a brief sketch of the development of the intellectual faculties, and expressed my intention of completing that sketch by a similar analysis of the emotions and the will. That intention has never been fulfilled. On reconsidering the subject, I found that the whole treatment of psychology required to be thrown into a more regular and scientific form; that outlines needed to be filled up with details; and that the speculative element required to be more completely eliminated from the inductive application of facts. In place, therefore, of perfecting the sketch already published, I determined to commence again *de novo*; to enter more minutely into the analysis of the intellectual powers; to carry that analysis onward to the phenomena of volition and feeling; and then to issue the whole in a complete form. This determination I have now carried into effect. The work herewith presented to the public is, consequently, not in any sense a re-elaboration of the former one. About the Publisher *Forgotten Books* publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. *Forgotten Books* uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
