

## The Nature of Music, Original Harmony in One Voice (Classic Reprint)

This work was originally planned in two parts, but only six chapters and one section of Chapter VII which was to conclude Part I, were written at the time of the authors death, Monday, April 22, 1907. The one section of Chapter VII has been omitted from the book because it was not left in the form in which it would have been published. The title of the chapter is Potential Harmony of Melody. Expansion of Tonality. Chromatic Harmony. Modulation. Asterisks in the manuscript have been preserved in the text; they indicate where footnotes were to have been supplied. Dates in the manuscript show that Chapter III was finished during September, 1904, and Chapter IV April 9, 1905. These six chapters unrevised are published as they were left, with one exception. To make space for the examples on page 238 a sentence has been omitted. It reads, Thus the full thorough-bass index of the above terce-form would be of which 6is the abbreviation. The Bird-songs published as an appendix were probably not intended to form a part of the book, but I wish to preserve them and they may be of interest. Twenty-five, Nos. 62-86, are entitled Birds of Idlewild 1903, however with the exception of a few from Silver Lake near Oconomowoc most of these songs were heard and recorded during several summers at Idlewild near Sturgeon Bay, Wisconsin. (Typographical errors above are due to OCR software and dont occur in the book.) About the Publisher Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology. Forgotten Books Classic Reprint Series utilizes the latest technology to regenerate facsimiles of historically important writings. Careful attention has been made to accurately preserve the original format of each page whilst digitally enhancing the aged text.
