

Elementary principles of arithmetic; with their application to the trade and commerce of the United States of America. In eight sections. By Thomas Sarjeant, late master of the mathematical school

Elementary principles of arithmetic; with their application to the trade and commerce of the United States of America. In eight sections. By Thomas Sarjeant, late master of the mathematical school

The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. Medical theory and practice of the 1700s developed rapidly, as is evidenced by the extensive collection, which includes descriptions of diseases, their conditions, and treatments. Books on science and technology, agriculture, military technology, natural philosophy, even cookbooks, are all contained here.++++The below data was compiled from various identification fields in the bibliographic record of this title. This data is provided as an additional tool in helping to insure edition identification:++++Library of CongressW002676Half-title: Elementary principles of arithmetic and bookkeeping, etc. This work is designed as a first course of instructions .. and is laid before the public as a compilation only.--Preface. Title vignette (intaglio). An introduction to the counting house; or A short specimen of mercantile precedents .. By Thomas Sarjeant. Intended as a supplement to the Elementary principles of arithmetic. ...--52 p., last count, with separate title page, dated 1789 (Evans 22127). The Elementary principles of arithmetic, and the Introduction to the counting house, may be had, bound together, at half a dollar; or on fine paper at 5s.--p. [4], last count. The following errata in the Arithmetic, have been discovered since its publication.--p. 52, last count.Philadelphia : Printed by
