

## In Makrs Shadow: Book One - Symbiosis (Harrys Reality 1)

Ninety percent of the people live in a fantasy world, ten percent see the horrible reality and choose to live there. One percent of the ten percent, feared by everyone, are the only ones fighting a losing war with the artificial intelligent menace running the planet. Is this the end of the world or the beginning of a new one? Harry Bolls may be the worlds only human hope. He is a man who complains of missing memories, who can see through illusions. And, hes afraid of his own shadow. (This book was previously published as Harrys Reality.)
