

## Unendurable (Near Future Dystopia Book 3)

In the year 2099, the whole world is a supercapitalistic society, where a thousand families own everything. The economy is flourishing; productivity and technology have produced all kinds of marvels. Nevertheless, in this marvelously rich society, Andrew Drexel wonders why 99.9% of the people are so poor. Poor people, imprisoned inside enclosed Relocation Regions, live in squalor, violence and suffering. Seven billion are inmates, while seven million live in decadent luxury. Ursula was born inside one of these RR centers, she is young, but understands that the system is evil. Andrew has sought refuge inside the RR, fleeing from the ParaRich families who control the world. Danger brings them together. Andrew understands the worlds of rich and poor. Ursula wants change. In peril and hiding, their electrifying love creates fortuitous synergism. With the help of a dreaded artificial intelligence, they try to create a new world order. A task well above their capabilities.
