

Falling Free

When humanoids are genetically produced for capital gain, what are their human rights? Leo Graf was just your average highly efficient engineer: mind your own business, fix whats wrong, and move on to the next job. Everything neat and according to spec, just the way he liked it. But all that changed on his assignment to the Cay Habitat. Leo was to teach welding to a secretly produced batch of humanoid workers genetically engineered with two additional arms instead of legs to be ideally suited to working in free fall. Could he just stand there and allow the exploitation of hundreds of helpless children merely to enhance the bottom line of a heartless megacorporation? Leo hadnt anticipated a situation where the right thing to do was neither safe nor in the rules. Leo adopted a thousand quaddies. Now all he had to do was teach them to be free. Falling Free is the 1988 Nebula Award Winner for Best Novel
