

# Immunology for Surgeons

An understanding of the complex workings of the immune system is essential for all surgeons. Immune responses play a crucial part in the way human body reacts to infection and trauma. Immunology for Surgeons contains a high-level discussion of this difficult clinical area. The text looks at tumor immunobiology and immunotherapy as well as the worldwide results of various clinical trials. The topics discussed focus on relevant immunological and molecular biological trends for future treatment of complex surgical disease. The main objective of the text is to render a difficult area accessible for the postgraduate surgical trainee and established surgeon who is interested in immunology.
