

Johann Friedrich Herbart, Vol. 5: A Study in Pedagogics (Classic Reprint)

Excerpt from Johann Friedrich Herbart, Vol. 5: A Study in Pedagogics

The article on Herbart in Reins Encyklop?disches Handbuch der Padagogik is supplied with references and a bibliography on a scale by which one can measure the greatness of Herbarts influence. Potent as that now is, it took some time to declare itself. Seventy years have passed since the death of the teacher-philosopher, and his General Pedagogy was published more than a century since; but it is only within the last forty years that his doctrines have become popular even in Germany, while twenty years ago his name was hardly known among English-speaking peoples. At Jena, since 1885, Dr. Rein has been the centre of a Herbartian propaganda, and has attracted teachers from all parts of the world, among them a considerable number of American, a smaller number of English, a still smaller number of Scottish, teachers. An illustration of the way in which Herbartianism has spread is afforded in the writings of M. Gabriel Compayre. In his History of Pedagogy, first published in 1879, he made no attempt to expound the ideas of Herbart, contenting himself with one or two general observations on the emphasis laid by Herbart on the connection between psychology and pedagogy.
