

# Leaving Home

Leaving home and successfully establishing a self-determined life is the great challenge of young adulthood, and many have a very hard time with the task. Metaphorically, young people leave home over and over again throughout their development; these early leavings may be seen as preparation and practice toward an autonomous, self-reliant life. This book explores the process of leaving home at each level of development from birth to emerging adulthood, providing theory and experience relevant to each stage for young people and their families. The author has three emerging adult children of his own, and his desire is that this book will be a positive force towards optimizing success for young people in leaving home and going forward in a good way, and for parents and other older adults in letting go.
