

## Milky Way Repo

Blue collar Sci Fi in the vein of Firefly. Running a starship repo company isnt easy or cheap. Its just an endless string of fuel costs, ship maintenance, legal red tape, unhappy debt bailers, shady associates and uncooperative dock officials from one end of the galaxy to the other. Nathan Teller owns and operates Milky Way Repossessions, a company that tracks down and repossesses starships. And although hes only managing to break even on his debt, he wouldnt trade it for anything. (His ex-wife holds that against him. No surprise there.) When Nathan and his crew successfully steal a freighter from the clutches of a particularly tenacious and corrupt dock official, he earns the respect of their high profile employer. Opportunity seems a sure thing. Nathan should be happy. But when that lucrative job op turns into a ransom delivery for a starship crew being held hostage by a cult, he suddenly finds himself pursued by a self-immolating loan shark hell bent on collecting a gambling debt. How will it all turn out? You never know. Especially when Nathan and his Starship repo agents are up against a cult and the mob... I think Milky Way Repo carves out a unique niche in science fiction by presenting protagonists that work hard for a living, sort of a genre of blue collar sci-fi. The world is bigger than them and there isnt a large fascist government operating against them. In this case, the characters struggle to make ends meet and do so against forces that are relatable; the economy, employers that hold sway over workers, religious elements, and organized crime figures that move in the shadows. -- Michael Prelee, author
