

Hints on Organ Accompaniment (Classic Reprint)

In view of the fact that an organist is frequently required to play various piano accompaniments on his instrument, and that many cannot adapt them effectively, it would seem that some ideas on this important subject might be of value to many organists. In the following pages the aim is to help with suggestions rather than by giving definite rules, which must often be disregarded for specific reasons. It is hoped that the suggestions given will prove of benefit to many who are striving to perfect themselves in a branch of playing too often neglected.
