

Diagnostic Pathology: Hepatobiliary and Pancreas, 2e

The latest edition of Diagnostic Pathology: Hepatobiliary and Pancreatic has been completely updated, boasting new text, images, and terminology to keep you current with the latest knowledge in the field. Designed for both practicing pathologists and pathologists in training, it boasts a concise, organized format and numerous high-quality images to help you quickly address everyday challenges. New classification/terminology for biliary and pancreatic noninvasive intraductal tubular and papillary lesions. Updates of variants, immunohistochemical diagnoses, diagnostic criteria, and novel molecular aspects for hepatocellular carcinoma. Updates of molecular and immunohistochemical classification of multiple entities, including hepatic adenomas. New grading scheme/terminology for pancreatic neuroendocrine tumors. Immunohistochemical diagnosis of focal nodular hyperplasia. Templated page layout, bulleted text, and a generous number of high-quality images for point-of-care clinical reference. Expert Consult eBook version included, which allows you to search all of the text, figures, and references from the book on a variety of devices.
