

# Principles of Topological Psychology

This antiquarian text contains a comprehensive treatise on topological psychology, being a detailed exposition of its principles written by Kurt Lewin. Written in clear, plain language and full of information fundamental to understanding this branch of psychology, this text will be of considerable utility to the student, and it would make for a great addition to collections of allied literature. The chapters of this book include: The Present State of Psychology, Formulation of Laws and Representations of General Situations, Considerations About Representing Life Space, Context and Extent of the Psychological Life Space, Causal Interconnections in Psychology, etcetera. We are republishing this vintage book now complete with a specially commissioned new biography of the author.
