

Psychology: A New Introduction

The aim of this book is to provide psychology students with an accessible and comprehensive introduction to all major aspects of psychology. The book is fully in line with the revised AEB A-level Psychology syllabus and is divided into seven units which cover approaches and methods, biopsychology, cognitive psychology, developmental psychology, social psychology, abnormal psychology and perspectives. Each chapter includes a detailed summary for content review and exercises to help students revise. Though aimed at A-level students, the text is also suitable for undergraduates.
