

Raphael in Early Modern Sources 1483–1602 (Romische Forschungen Der Bibliotheca Hertziana)

A two-volume presentation of every known document concerning Raphael during a period of 120 years, from his birth in 1483 to 1602. The chronologically organized collection includes some 1100 documents, some of which are little known, concerning the artist, his work, writings, family, properties and other matters. The set should be a useful resource for art historians and historians of the Renaissance. Each document is included in transcription, in most cases made afresh from the original, and translations are provided for literary Latin and Greek. For each entry John Shearman provides commentary as well as a critical history and bibliography. In addition he offers an overall introduction that deals with the nature of documentary research, its limitations and possibilities, and the history of facsimiles and forgeries. Three indexes complete the two volumes.
