

AIDS: Terror Truth Triumph

AIDS -- The Killer Among Us -- Is Preventable And Controllable! This is part of the message of AIDS-- Terror, Truth, Triumph by medical writer Michael L. Culbert, D.Sc. Now, for the first time, a 12-chapter monograph explains the nature and multifactorial aspects of the most severe killer disease introduced in this century.... The author notes, for example, the links between AIDS and drug use of all kinds, the connection between AIDS, ARC (AIDS-Related Complex) and fluoridated water, the role of food processing (Particularly hydrogenated fats) in suppressing the immune system, the threat to immunity presented by modern medicine (antibiotics, corticosteroids, etc.) in immune depression, the role of multiple viral and venereal infections in helping set the stage for the devastating syndrome, the specific challenges of anal lubricants in the overall picture, the parasite connection -- and the reality that AIDS is NOT a gay disease. The chilling possibilities of insect-borne transmission and of possible biochemical warfare aspects in the elaborated of the so-called AIDS virus are also covered in this landmark book. Culbert also notes optimistic results of holistic/eclectic therapy in ARC, pre-AIDS and AIDS cases and sets forth common-sense approaches to prevention. --- from books back cover
