

Musical phenomena, founded on unanswerable facts; and a proof that musical instruments have been hitherto fabricated on the most improper materials. ... No. I. contains an account of the aiuton

Musical phenomena, founded on unanswerable facts; and a proof that musical instruments have been hitherto fabricated on the most improper materials. ... No. I. contains an account of the aiuton

The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. The eighteenth-century fascination with Greek and Roman antiquity followed the systematic excavation of the ruins at Pompeii and Herculaneum in southern Italy; and after 1750 a neoclassical style dominated all artistic fields. The titles here trace developments in mostly English-language works on painting, sculpture, architecture, music, theater, and other disciplines. Instructional works on musical instruments, catalogs of art objects, comic operas, and more are also included. +++The below data was compiled from various identification fields in the bibliographic record of this title. This data is provided as an additional tool in helping to insure edition identification: +++British Library T112448 By Charles Clagget, whose name occurs in the text. No more published? - With a half-title and an additional titlepage: No. 1. of Musical phenomena. London : printed for the author; and sold at the Musical Museum, 1793. [2], 22p., 2 plates : ill., engr. music ; 4
