

The Dawning Clocks of Time

Sven Chandra, a bounty hunter from the planet Io, orbiting the great star Alpha Centauri, is the Federation's most important asset. Being the most successful bounty hunter has made him the one who must do all of the Federation's missions that they set for him. However, with the ensuing battle against the alien race of the Karaks for light speed, and a planet in danger, Chandra's mission is to become one on a galactic scale like no other. The Dawning Clocks of Time had been set long ago by the Progenitors of the Galaxies, and it will not wait.
