

## Elementary Psychology (Classic Reprint)

Excerpt from Elementary Psychology An attempt is made in this little volume to exhibit the processes by which we know, by employing familiar examples and illustrations. It proposes Psychology by self-observation and experiment; it aims to centre the attention of the student upon the process itself, and get him to observe that; over against this is the commoner method of setting him to learn definitions. The result of the use of most books on the subject is to leave merely a residuum of definitions. In this book the definitions are few and far between. The student must have his attention repeatedly called to the process of knowing in general, which involves somewhat the philosophy of Psychology. There is an outside world that has qualities that cause effects (images) in the inner world (the mind). About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
