

Pictorial Narrative in Ancient Greek Art (Cambridge Studies in Classical Art and Iconography)

This book provides a comprehensive framework for the development of pictorial narrative in ancient art. Through the application of literary theory about narrative, particularly semiotics and structural analysis; the examination of ancient descriptions of real and poetic works of art; and a contextual examination of a wide range of works, Mark Stansbury-O'Donnell identifies the multiple levels at which narration operates, from the most basic signs to the object of narration for the ancient viewer. This study also defines and standardizes a vocabulary for pictorial narrative.
