

Vulcan!: Star Trek

CAPTAINS LOG, 6454.4 Due to a series of freak ion storms, the Neutral Zone separating the Federation from the Romulan Empire will soon shift--and the planet Arachnae will fall entirely within Romulan space. Our mission: seek out intelligent life there and, if it exists, offer full Federation protection. To help us complete the necessary surveys, Dr. Katalya Tremain was assigned to the U.S.S. Enterprise™. She is the Federation's foremost expert on the exobiology of this region--and, as I have just discovered, has a fanatical hatred of any and all things Vulcan...including my first officer. I have logged an official protest with Starfleet Command. Her behavior towards Mr. Spock is not only a disgrace to both her uniform and the Federation but also threatens the success of our mission...a threat we cannot afford when the fate of an entire civilization may rest upon our actions in the coming hours.
