

World Military History Bibliography on Cd-rom , Network Version 1-5 Users

Military institutions and methods of warfare in the non-Western world from antiquity through the early 20th century provide the chief subjects of this annotated bibliography of works published before 1967. Especially rich in references to periodical literature, it emphasizes military organization and relationships between military and other social institutions, rather than wars and battles. The bibliography comprises seven parts: (1) general and comparative topics, including works on the social, cultural, and biological causes of war; (2) the ancient world; (3) western Eurasia since antiquity; (4) eastern Eurasia since antiquity; (5) sub-Saharan Africa and Oceania; (6) pre-Columbian America; and (7) Indians in post-contact America.
